
Shubham Brijlal Pardhi

Java Backend Developer | Spring Boot | Microservices | Kafka | 4+ Years

Pune, Maharashtra | +91 8408015638 | sbpardhi34@gmail.com | [LinkedIn](#) | Open to Relocate

PROFESSIONAL SUMMARY

Java Developer with 4.2 years of experience in designing, developing, and maintaining scalable, high-performance enterprise applications using Java 8, Spring Boot, Spring MVC, and Spring Core. Strong expertise in building RESTful APIs, microservices-based applications, and integrating with PostgreSQL databases. Experienced in improving application performance, optimizing database queries, and enhancing system reliability. Proficient in working within Agile environments, collaborating with cross-functional teams, and delivering robust, customer-focused solutions. Skilled in backend development, debugging, performance tuning, and production support, with a strong commitment to writing clean, maintainable, and efficient code. Strong understanding of Core Java concepts including multithreading, collections, and performance tuning.

TECHNICAL SKILLS

Programming: Core Java, Java 8, SQL

Frameworks: Spring Boot, Spring MVC, Spring Core, Spring Data JPA

Architecture: Microservices, REST APIs, Distributed Systems

Messaging: Kafka, JMS

Database: PostgreSQL, Oracle, MySQL

DevOps: Docker, Kubernetes, Jenkins, CI/CD

Tools: Git, Maven, JUnit, Postman, Linux, Grafana

Concepts: Multithreading, Java 8, Java 17, OOPs, Design Patterns, System Design, Performance Tuning

PROFESSIONAL EXPERIENCE

Software Engineer – Infosys Ltd, Pune

Feb 2022 – Present

Project: Next Generation Activation Engine

- Responsible for backend development, API design, production support, and performance optimization.
- Migrated legacy monolithic application to microservices architecture using Java 8 and Spring Boot, improving modularity and maintainability.
- Developed and enhanced multiple RESTful APIs for telecom service activation workflows across downstream systems.

- Implemented BPMN workflows using Camunda, automating business processes and reducing manual intervention.
 - Optimized SQL queries and database interactions in PostgreSQL, improving API response time and performance.
 - Analysed logs and resolved production issues, ensuring smooth service execution and system stability.
 - Contributed to migration from Camunda to Flowable, validating workflows and fixing migration-related issues.
 - Supported Docker-based deployments and CI/CD activities, assisting in build and release processes.
-

Project: DMP-PAL (Domain Management Platform Access Layer)

- Developed JMS-based queue listener applications using WebLogic for asynchronous message processing.
- Built backend services using Java 8 and Spring Boot for integration between domain systems.
- Designed and implemented REST APIs for internal service communication and orchestration.
- Worked with Oracle and PostgreSQL databases, handling data persistence and resolving production issues.
- Investigated and fixed production defects, improving application reliability and uptime.
- Deployed and monitored applications in Kubernetes environments, analysing logs and verifying pod health.

Tech Stack: Core Java, Java 8, Java 17, Spring Boot, Microservices, REST API, Kafka, PostgreSQL, Docker, Kubernetes

EDUCATION

Bachelor of Engineering in Electronics and Communication Engineering
RTM Nagpur University, Bhandara | 2016 - 2020

CERTIFICATIONS & AWARDS

Certified Java SE8 Developer, Infosys
Certified Spring Associate, Infosys
Global Agile Developer Certification, Infosys
